WHY USE AN EXHAUST FAN?

There are 3 main reasons as to use exhaust fans:

To remove impurities in the air (moisture, smells, smoke, heat etc)

To encourage air circulation within an area

To transfer tempered (warm/cool) air from one place to another

These factors play a part in determining which exhaust fan will be suitable for the desired application. It can also be used to help eliminate condensation and mould in moisture exposed spaces.

This is a general guide to the majority of exhaust fans.

The steps required in picking out the correct exhaust fan are:

Determine what variant of exhaust is required and how it will be mounted (eg wall, ceiling, window etc)

Calculate the area being exhausted (Length x Width x Height). This will give you a figure in m³ (cubic meters)

Multiply this with the number of air-changes required (8 for a subfloor/meeting area, 13-15 for a bathroom or toilet, 15+ for smoke exhaust). If you like to have long, hot showers or are concerned about steaming up the bathroom then please use a figure of 15-20 air changes per hour

Determine whether to duct directly into the roof space, or through a wall.

Kinds of Inline fans

Mixflow Inline Fans: Mixed Flow Inline exhaust fans are a mixture between the Axial and Centrifugal models. They have good airflow and good pressure characteristics, can be used for longer runs of duct, bends, branches, etc. They show centrifugal fan characteristics from a size of 150mm upwards and axial fan characteristics for sizes smaller than 150mm.

Well Suited Applications for a Mix Flow Motor

Medium/Large bathroom, ensuite or laundry

Installation that has a moderate amount of ducting (from 0-20 meters approx)

Axial Inline Fans: Axial fan motors are generally suited to applications that require high extraction at a low pressure. Low pressure means that the fan is not particularly well suited when a long duct run is needed.

Well suited Applications for an Axial motor

A small toilet

A small bathroom, ensuite or laundry

An installation that has minimal ducting (less than a few meters).

Centrifugal Inline Fans:

A centrifugal extraction fan motor is the opposite to an axial motor in terms of its characteristics when dealing with pressure. The centrifugal motor has been engineered to operate with long duct runs which may have bends, junctions and multiple inlets/outlets.

Well suited Applications for a Centrifugal motor

Large heat transfer systems

Large Sub floor ventilation systems

Servicing a large area

An installation that has a vast amount of ducting (20 meters or more)

HOW TO SELECT EXHAUST FAN		Recommended Air Changes															
<p>1. Calculate the room volume : Length x Width x Height Eg. A Bathroom that is 3m by 2m and 2.5m high = 15m³</p> <p>2. Calculate required air movement: Room Volume x Recommended Air Changes Eg. 15m³ bathroom with 10 changes per hour is 15x10=150m³/h</p>	<p>So you have to select an exhaust fan with Air delivery of 150m³/h or greater.</p>	<table border="1"> <thead> <tr> <th>RESIDENTIAL PREMISES</th> <th>PREMISE TYPE</th> <th>RECOMMENDED AIR CHANGES PER HOUR</th> </tr> </thead> <tbody> <tr> <td></td> <td>Kitchen</td> <td>10</td> </tr> <tr> <td></td> <td>Bathroom</td> <td>12</td> </tr> <tr> <td></td> <td>Large Bathroom</td> <td>10</td> </tr> <tr> <td></td> <td>Toilet / Powder Room</td> <td>10</td> </tr> </tbody> </table>	RESIDENTIAL PREMISES	PREMISE TYPE	RECOMMENDED AIR CHANGES PER HOUR		Kitchen	10		Bathroom	12		Large Bathroom	10		Toilet / Powder Room	10
RESIDENTIAL PREMISES	PREMISE TYPE	RECOMMENDED AIR CHANGES PER HOUR															
	Kitchen	10															
	Bathroom	12															
	Large Bathroom	10															
	Toilet / Powder Room	10

CEILING FAN INSTALLATION SERVICE

Our New Installation Service Price Is Only ₹1000/- For Your First Fan And Just ₹500/- Each For Any Additional Fans That You Need To Install*

FAN INSTALLATION pricing includes:

- Travel distance of 20km from the store where the fan is purchased. Locations beyond 20km will only be accepted by negotiation on travel time & distance.
- The site should be ready as per our requirement with the concrete/wooden/false/gypsum ceiling capable of taking minimum weight of 45kgs.
- Maximum 3m ceiling height.
- Any works outside this scope will be discussed & charged extra.

TERMS & CONDITIONS

OUR RESPONSIBILITIES

- Normal manufacturer's product warranty will be applicable.
- Installation will be performed by a qualified licensed electrician and may be an employee of Luft fans or an independent trained contractor as solely determined by us.
- The nominated contractor will contact you to book the installation date and time that is suitable to you but must be during normal weekday hours.
- Installation bookings may be made outside of normal business hours or weekends by mutual agreement, however, may incur a surcharge.
- If you have a complaint after installation you must provide evidence of that complaint and/or allow Luft fans or its preferred contractor access to your site.

YOUR RESPONSIBILITIES

- You must have the fan/s at home with you in readiness for the installation.
- You must ensure that the product and installation service is suitable for your purpose and site. We are not liable if they are unsuitable.
- Any information you provide will be relied upon by us. You will be liable for any additional costs incurred if your representations are incorrect.
- You must ensure that the site is accessible and safe for the installer to attend and install the product.
- You must give us all relevant information about the site beforehand. You must provide the installer with access to the necessary areas and amenities as required.
- You confirm that you are the home owner or that you have authority from the home owner for the works to be undertaken. You must be at home during the installation.
- Your ceiling must be prepared and ready for installation as per our guidelines. Preparing the ceiling for installation is not under our scope.
- The fixed price installation offer is for installation of fans only and does not include the cost of any fans.

NOT INCLUDED

- There may be circumstances where your new fan can't be installed as the ceiling would not be ready as per our requirement, In these situations, additional items may be required to complete the installation. Any additional works or items require the approval of the customer prior to commencement. Pricing and payment for any additional works should be negotiated directly between the customer and installer.
- At the completion of the installation, there may be some pre-existing issues that are visible such as drill holes, ceiling scratches and scuff marks. The repair of such issues does not fall under our scope.
- Any specialist equipment or tools required for installation, e.g. scaffolding or scissor lift, will be provided by the client and is not in our scope.

WARRANTY TERMS

WARRANTY IS VOID IF THE CEILING FAN IS NOT INSTALLED BY A TRAINED PERSON.

THERE IS NO ONSITE WARRANTY, THE FAN HAS TO BE SENT TO THE COMPANY FOR SERVICING, KINDLY PRODUCE THE PURCHASE DETAILS TO CLAIM WARRANTY.

The Following is NOT covered by warranty.

- Damage from lighting or power surges, damage due to incorrect installation, Damage from over power delivery, water damage, damage arising due to improper power connection, and If installed or used outdoors.
- If used with automation dimmer or remote and regulator simultaneously.
- If Ceiling fans not installed by a licensed electrician.
- Ceiling fan used incorrectly, accidentally damaged, modified in any way or not serviced in accordance with the maintenance instructions.
- Burned motors / motor winding, fused bulbs, CFL tubes LED bulbs, remote and controllers are not covered under warranty. Batteries are not covered under warranty.
- Broken glass, broken blades or any other broken components or any other physical damage is not covered under warranty.
- Shipping cost incurred for sending the faulty fan and the replacement of new fan is not covered under warranty.
- Cost incurred in removal & reinstallation of the fan should be borne by the client.
- Cost incurred in renting of special equipments like ladder, scaffolding, scissors, lift etc., are not covered under warranty.
- Wobbling of fans, bump in the noise of the fan is not covered under warranty.
- Luft is liable to repair or service the faulty part. In rare case where the faulty part cannot be repaired the company will be liable only to replace the faulty component with a new one & is not obliged to refund the amount or replace the entire fan with a new one.

ANY COMPLAINTS REGARDING MISSING COMPONENTS, MISSING PARTS, PHYSICAL DAMAGES, SCRATCHES, AND ANY OTHER CLARIFICATION WILL BE ENTERTAINED ONLY WITHIN 2 DAYS OF RECEIVING THE FAN, AFTER 2 DAYS COMPANY IS NOT RESPONSIBLE FOR THE SAME.
